BCS 7-B

Department Of Computer Science

Task 1: Create and Configure Your GitHub Account

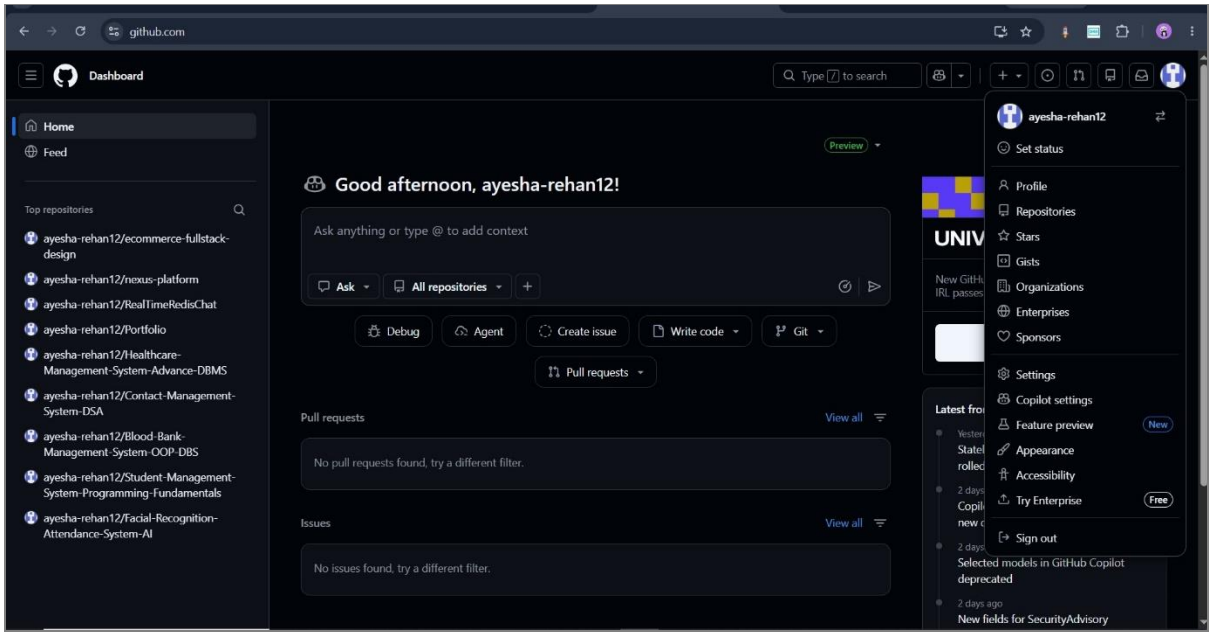

Figure: GitHub profile showing my profile name and GitHub username.

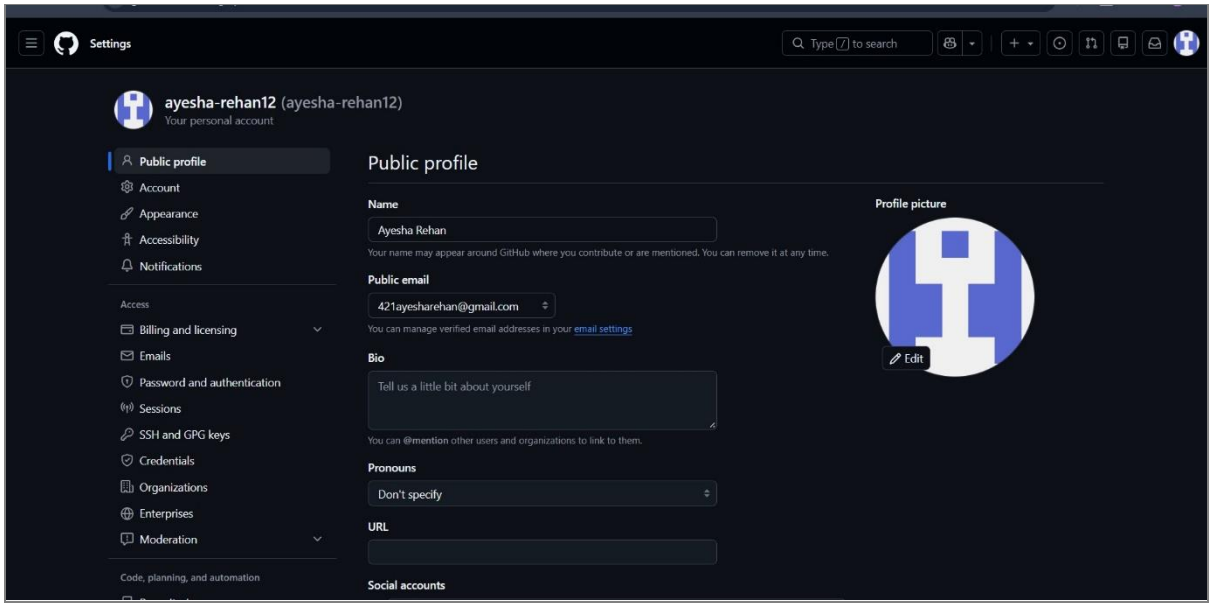

Figure: GitHub Settings > Public profile with my complete actual name entered in the Name field.

Task 2: Register in the Student Marks Portal

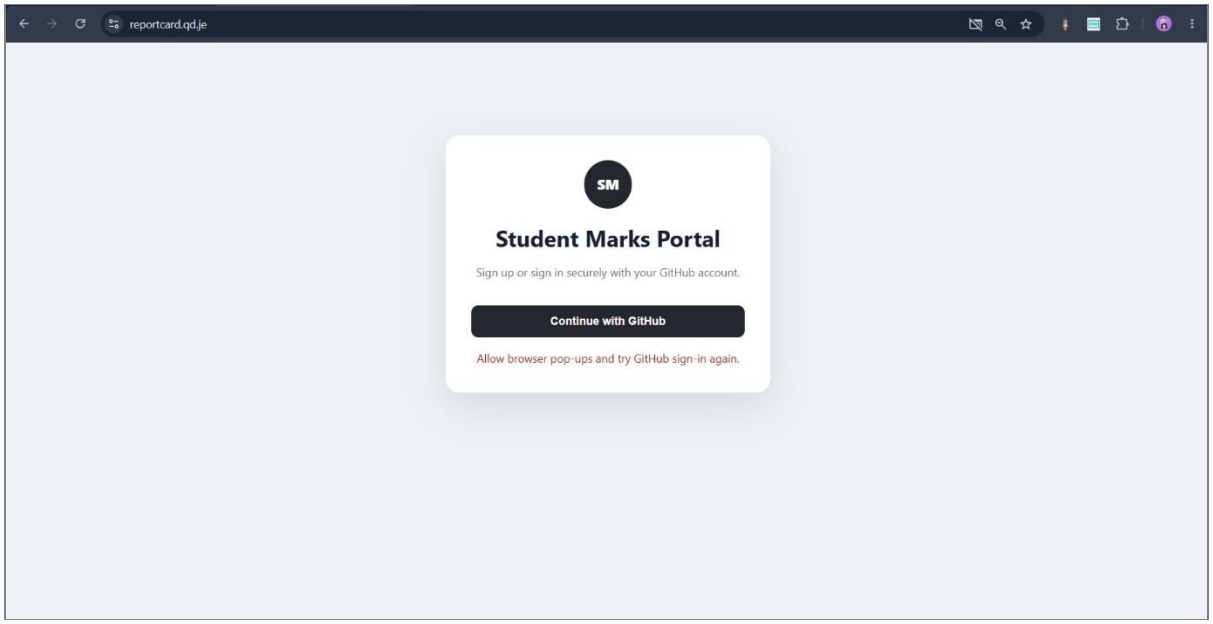

Figure: Student Marks Portal login page.

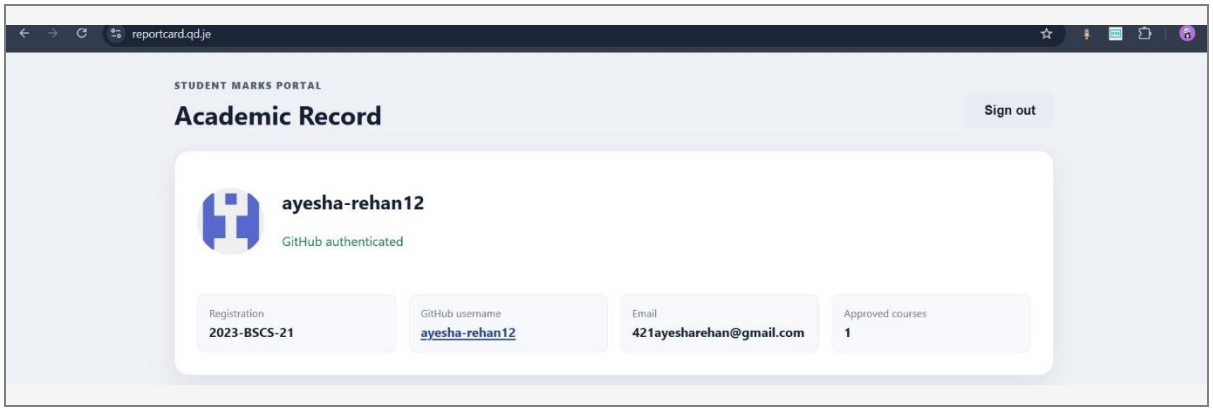

Figure: My GitHub profile information displayed inside the portal after signing in.

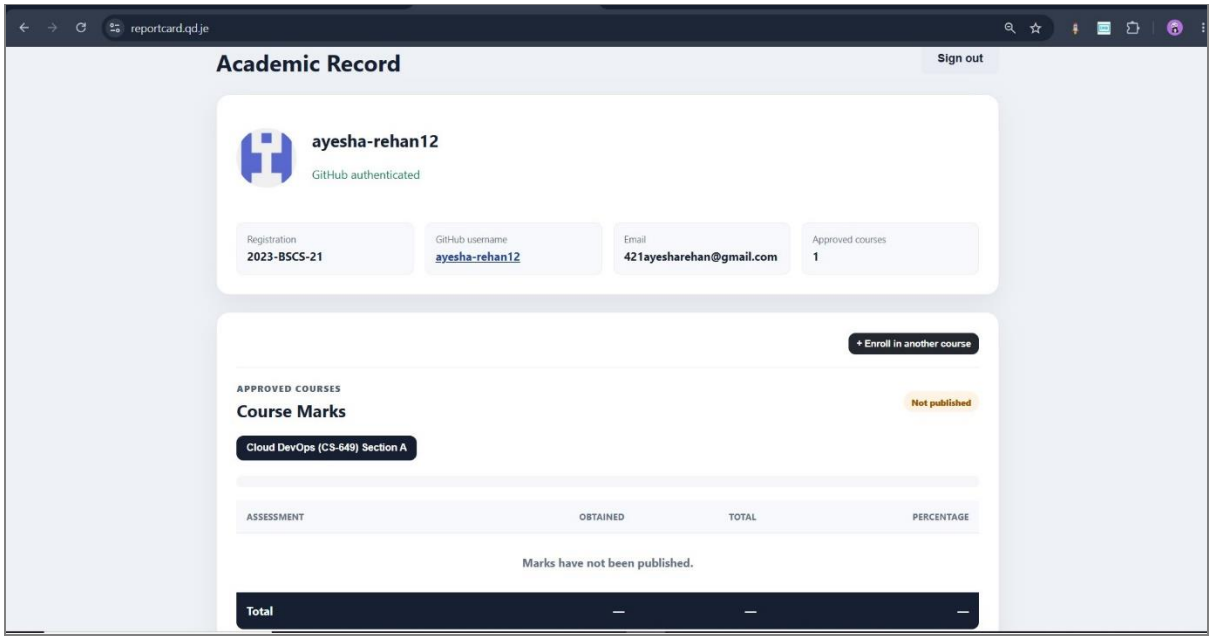

Figure: Submitted (pending) enrollment with registration number, course code, and section.

Task 3: Download VMware Workstation Pro and Ubuntu Server

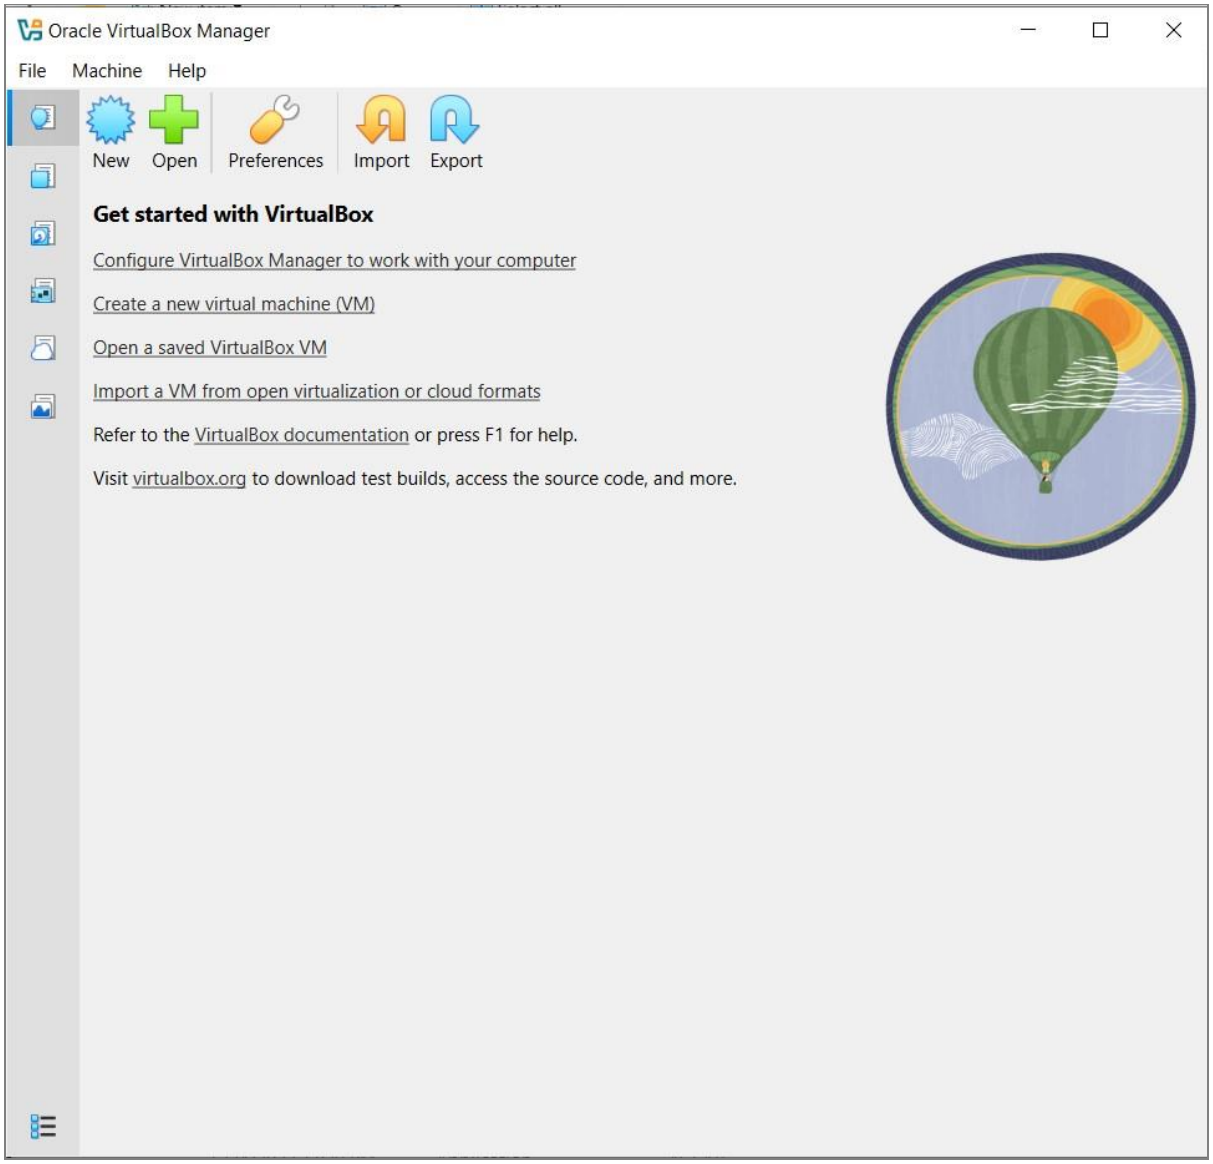

Figure: VMware Workstation Pro installed and running.

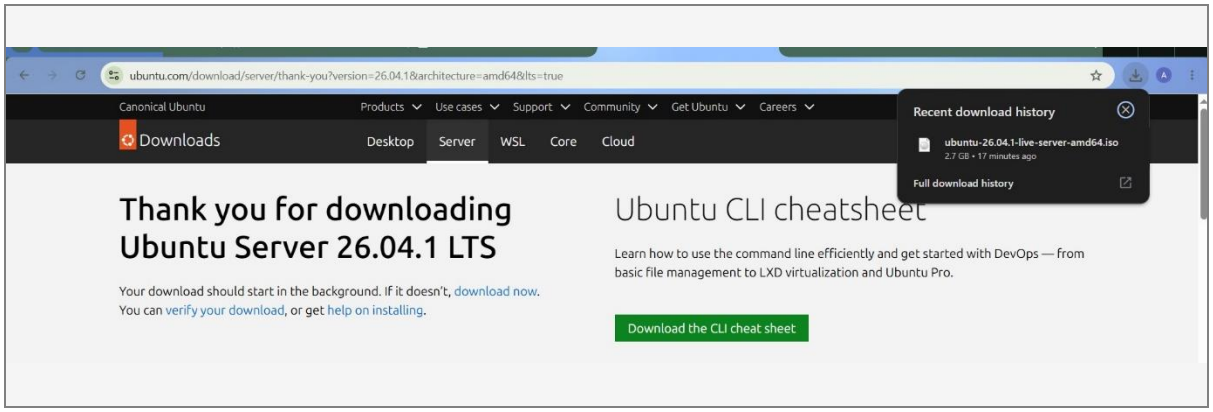

Figure: Downloaded Ubuntu Server LTS ISO file with its filename.

Figure: Available storage showing at least 20 GB free for the virtual machine.

Task 4: Create the Ubuntu Server Virtual Machine

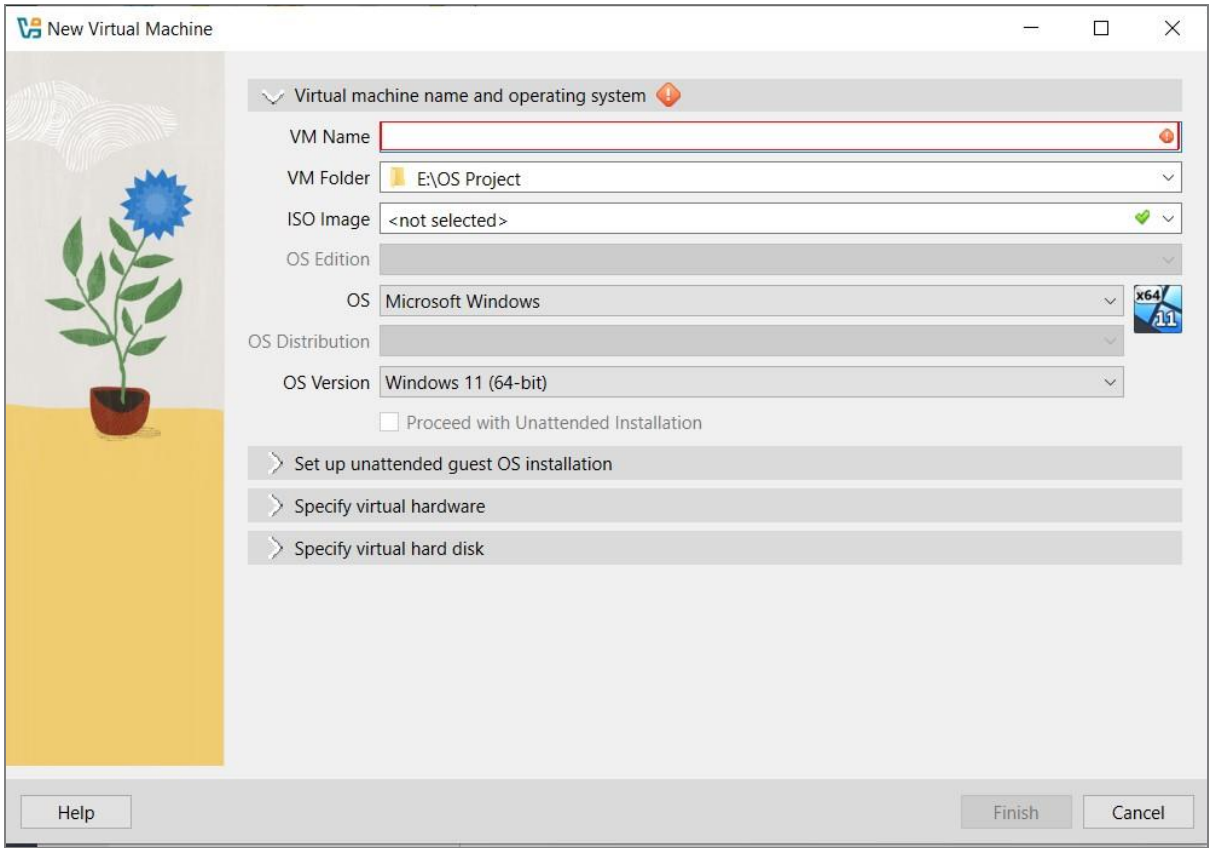

Figure: New Virtual Machine Wizard opened in VMware Workstation Pro.

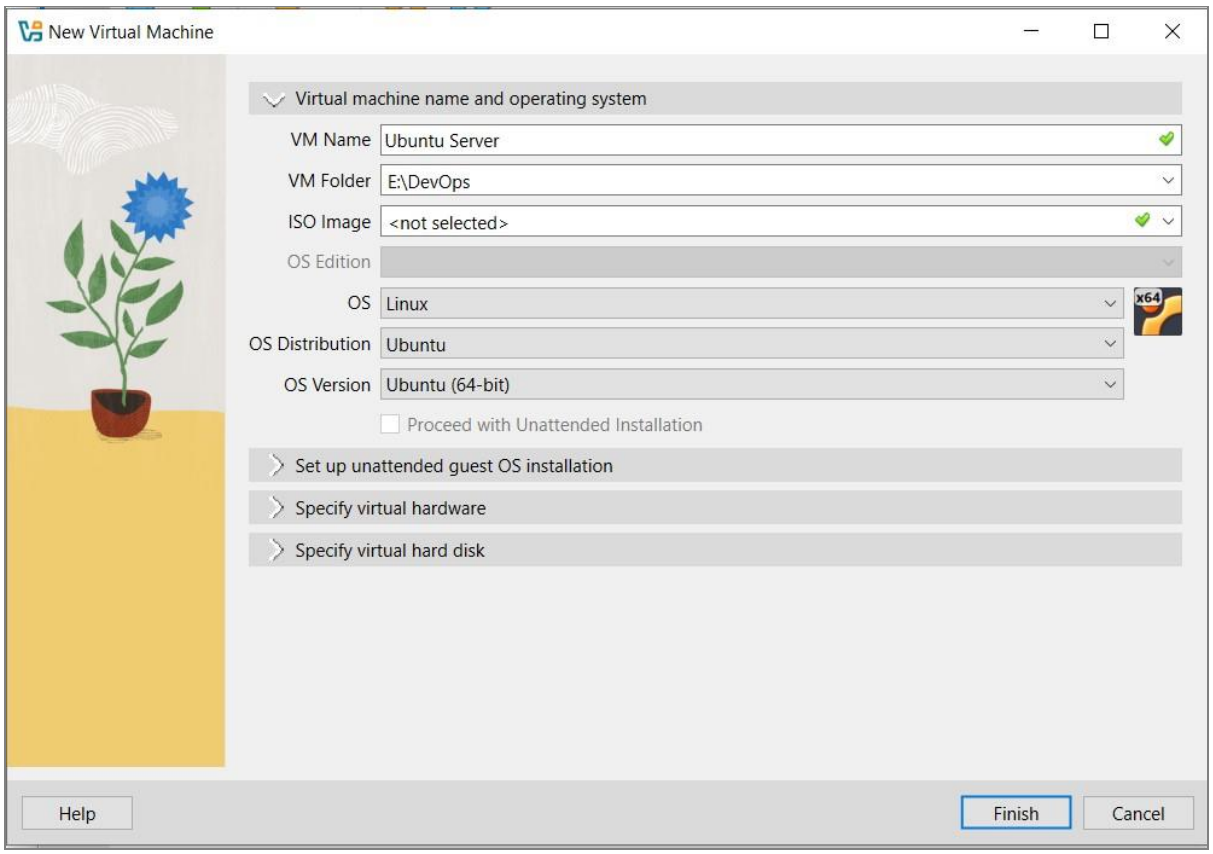

Figure: Typical (recommended) configuration selected.

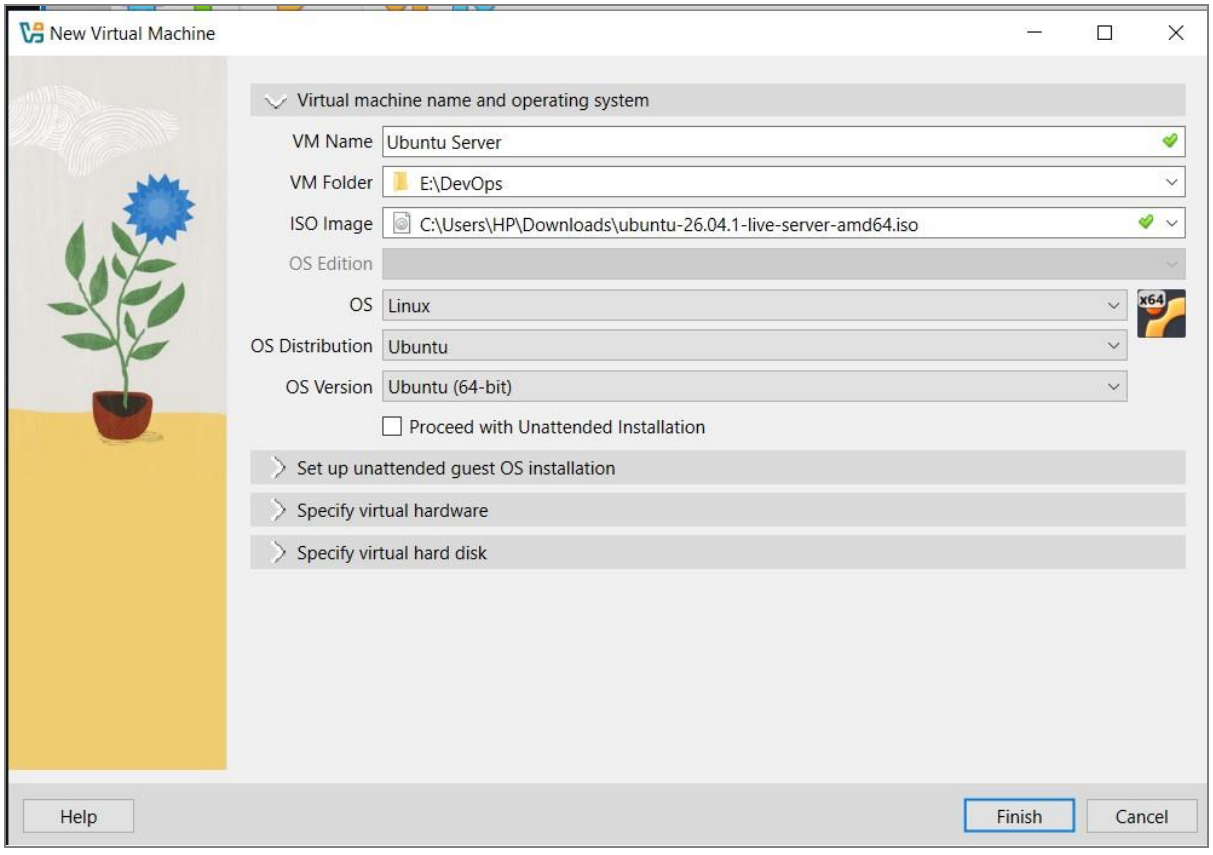

Figure: Ubuntu Server ISO path selected as the installer disc image file.

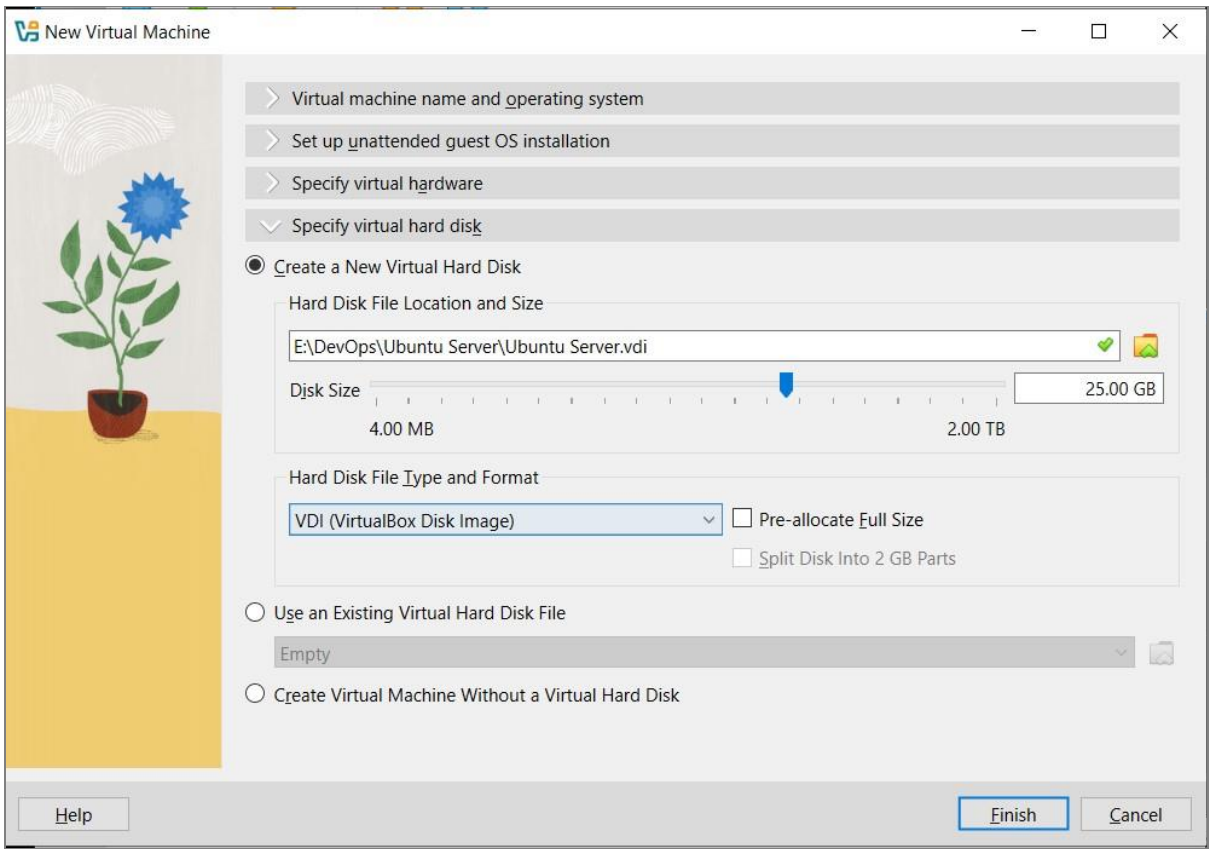

Figure: Final virtual machine configuration summary with at least 20 GB disk.

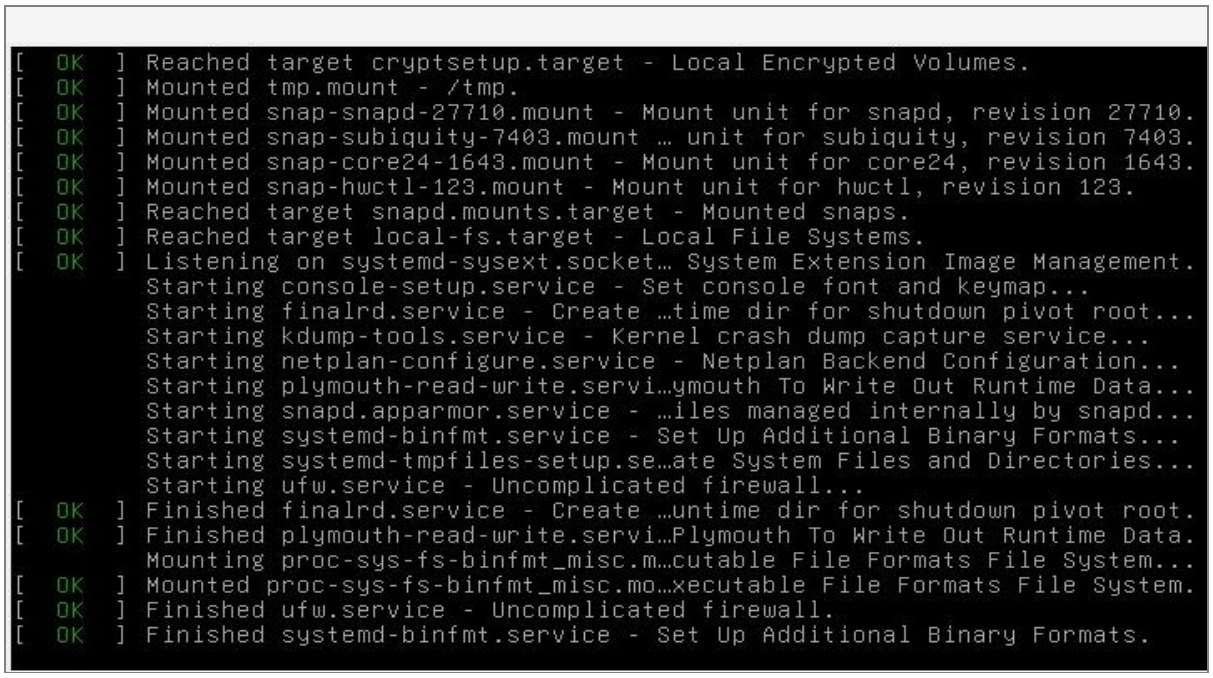

Figure: Ubuntu Server installer boot screen after powering on the VM.

Task 5: Choose the Installation Language

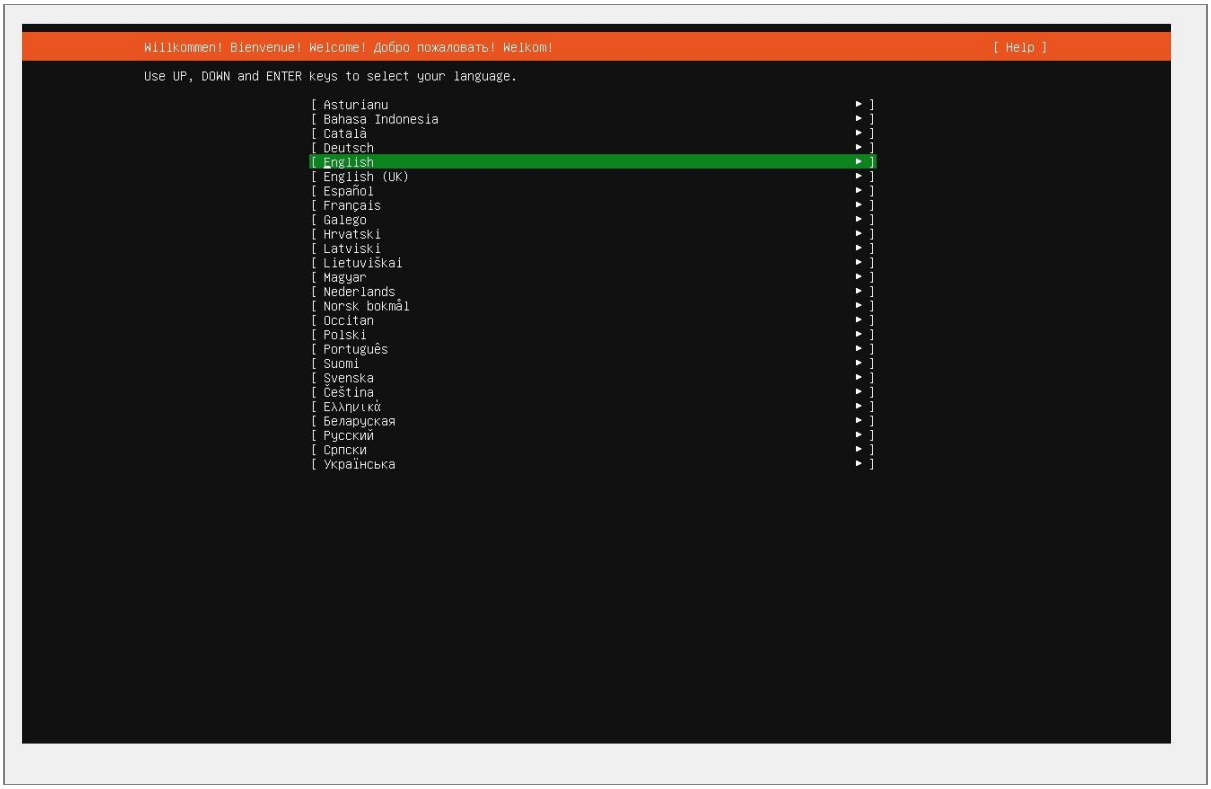

Figure: Installation language selected in the Ubuntu Server installer.

Task 6: Configure the Keyboard Layout

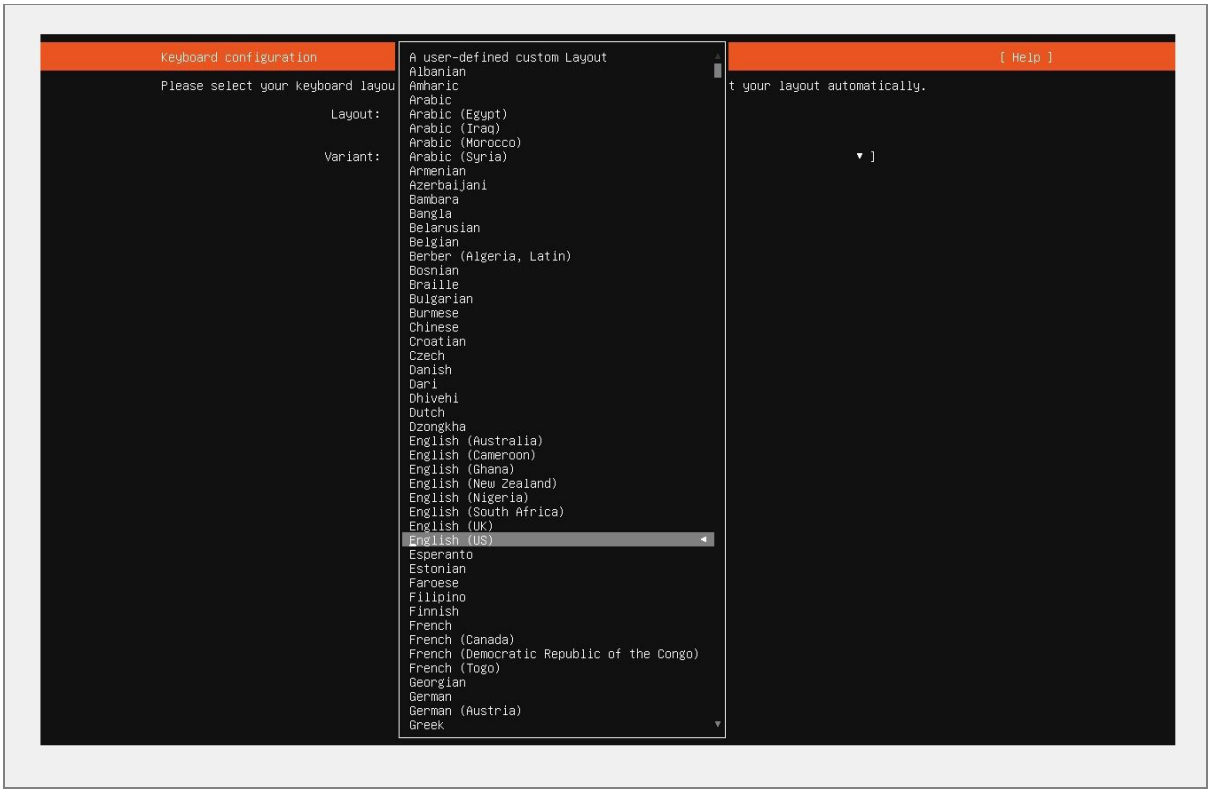

Figure: Keyboard layout selected to match my keyboard.

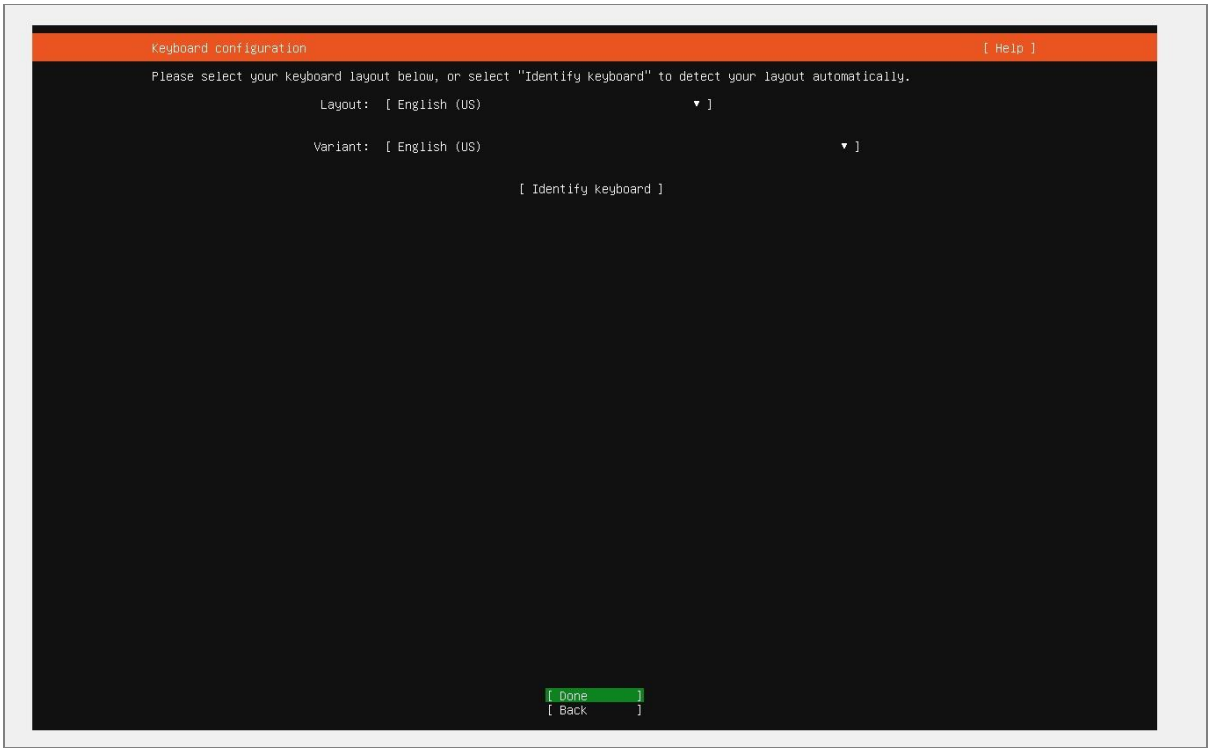

Figure: Keyboard variant selected.

Task 7: Choose the Ubuntu Server Installation Type

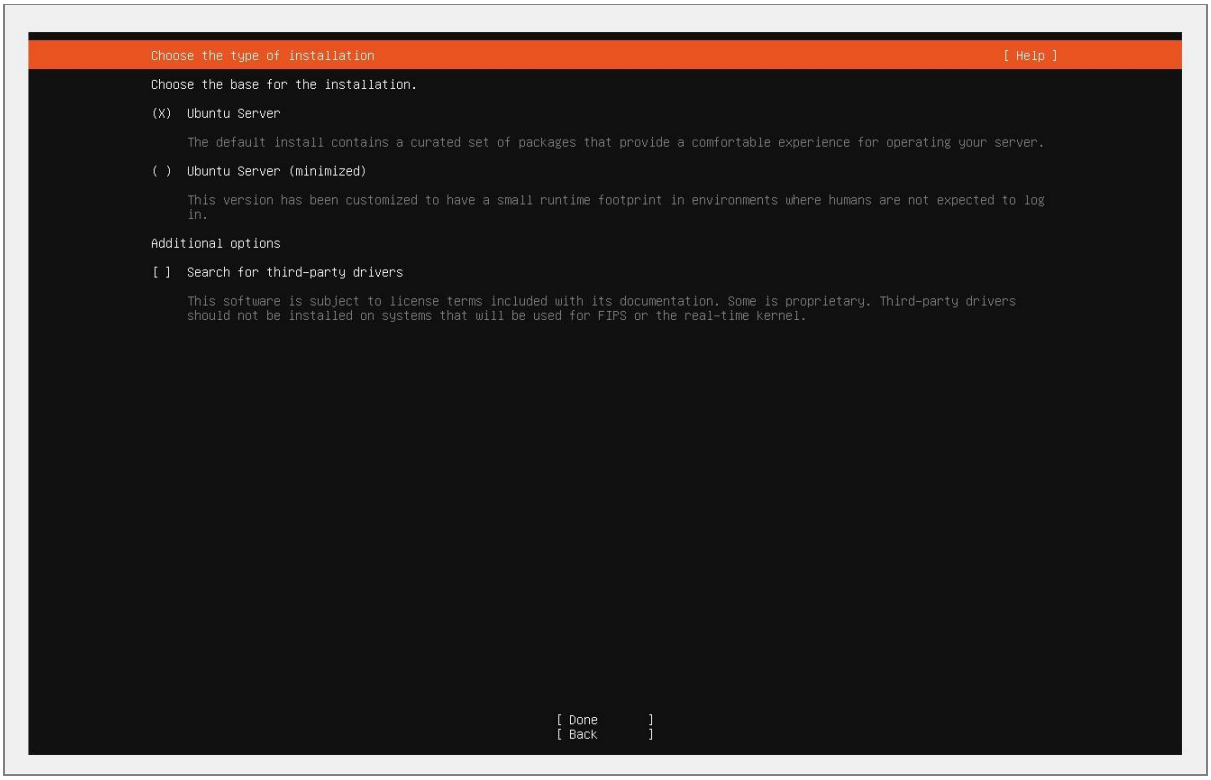

Figure: Normal Ubuntu Server installation type selected (not MAAS).

Task 8: Configure the Network

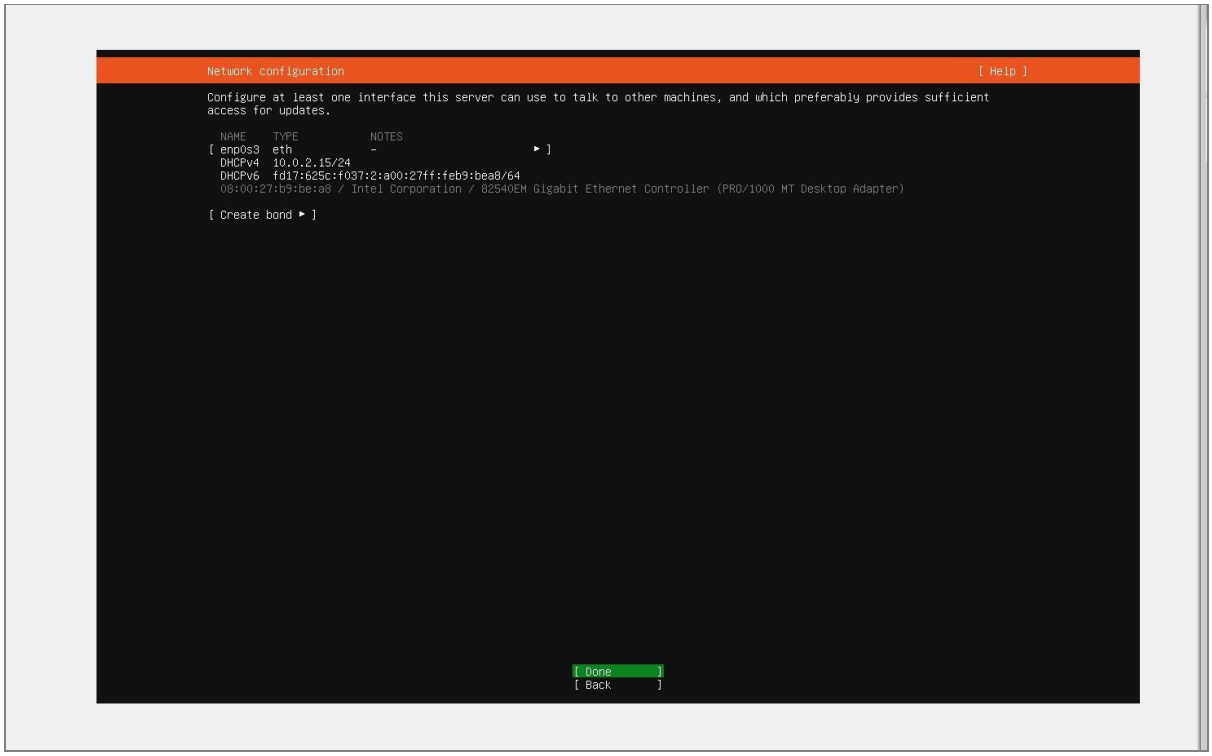

Figure: Network interface detected by the installer.

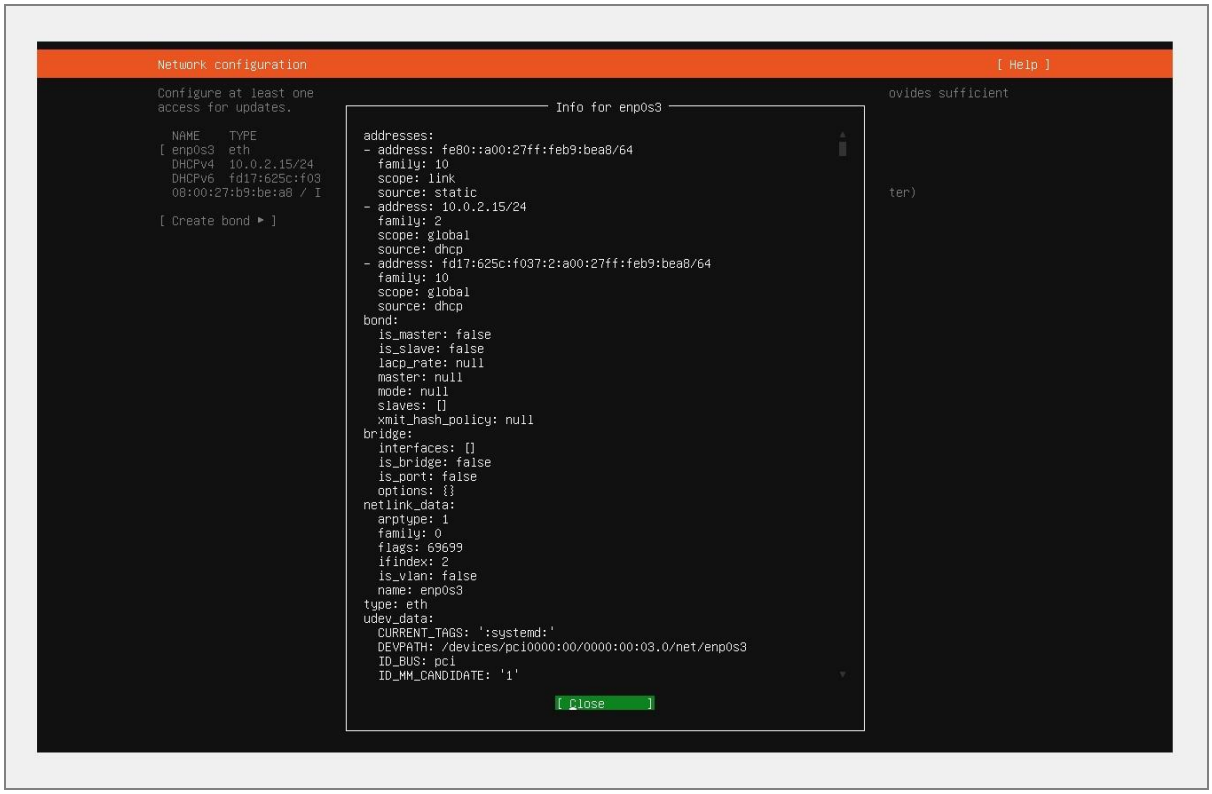

Figure: Network address assigned automatically through DHCP.

Task 9: Configure Storage

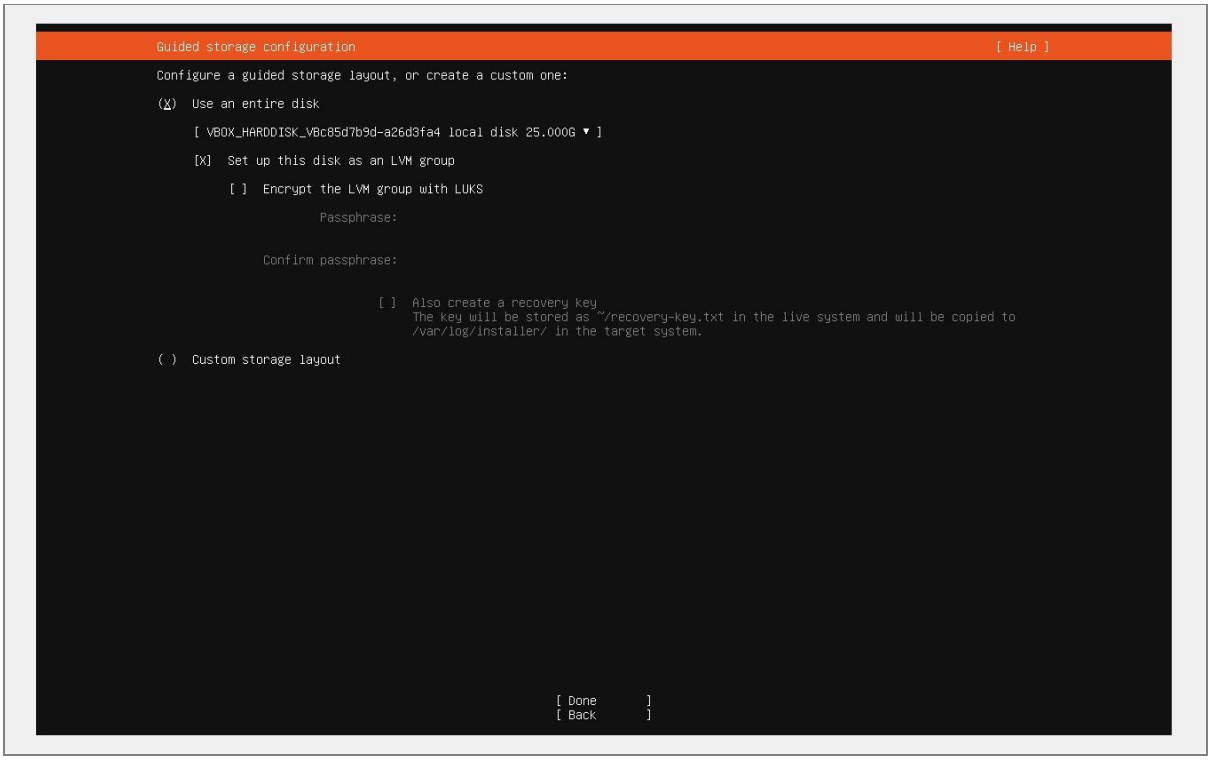

Figure: Guided storage option selected to use the VMware virtual disk.

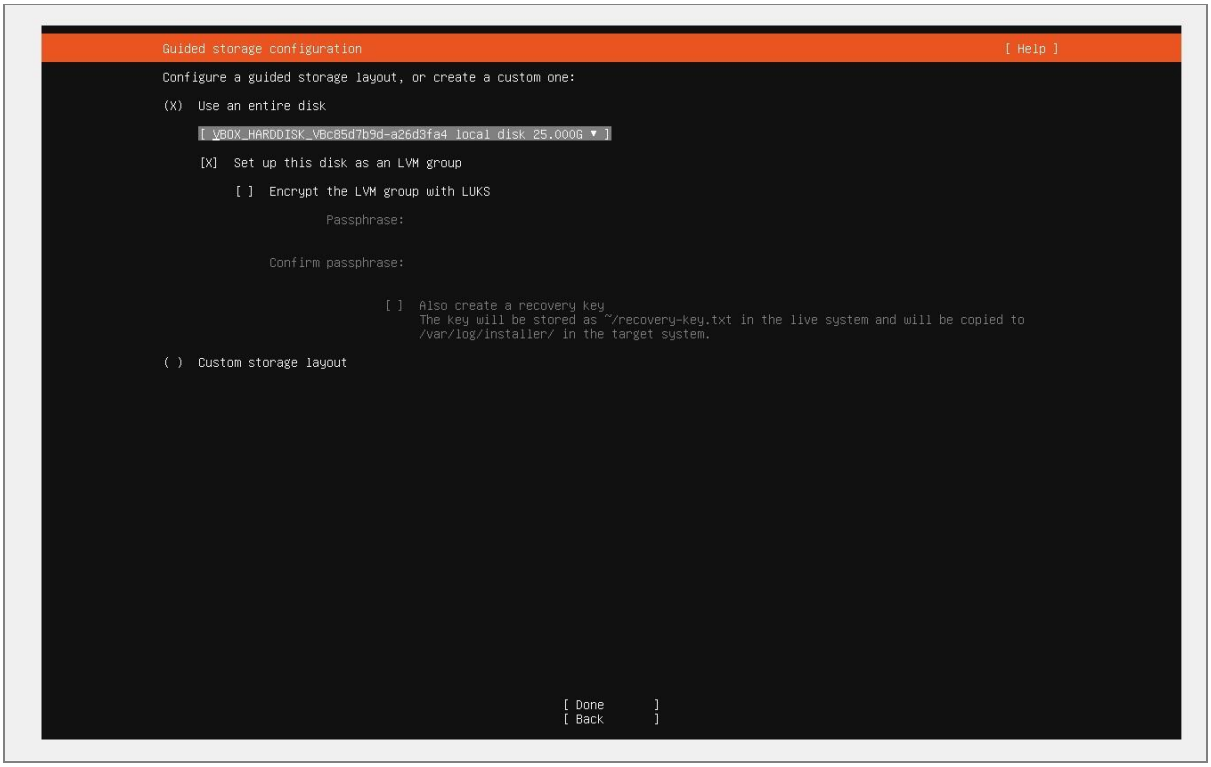

Figure: Storage configuration reviewed before continuing.

Task 10: Select the Installation Disk

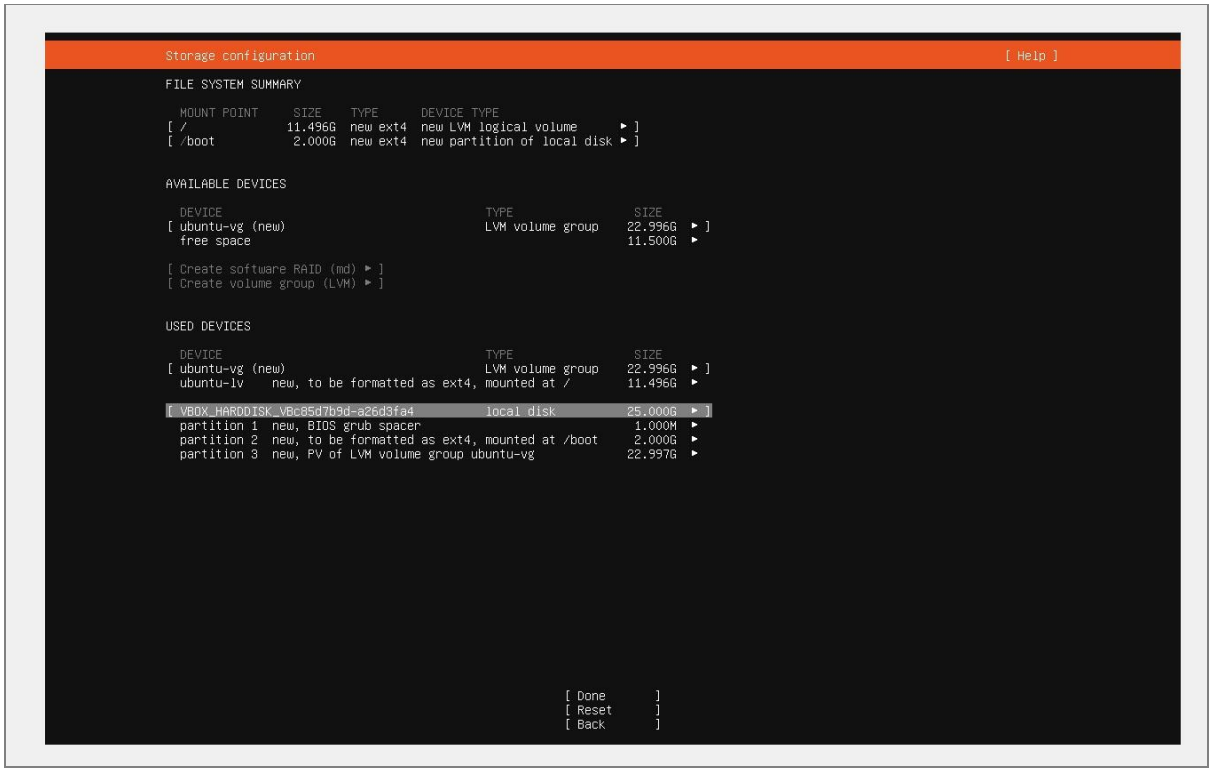

Figure: VMware virtual disk selected for installation.

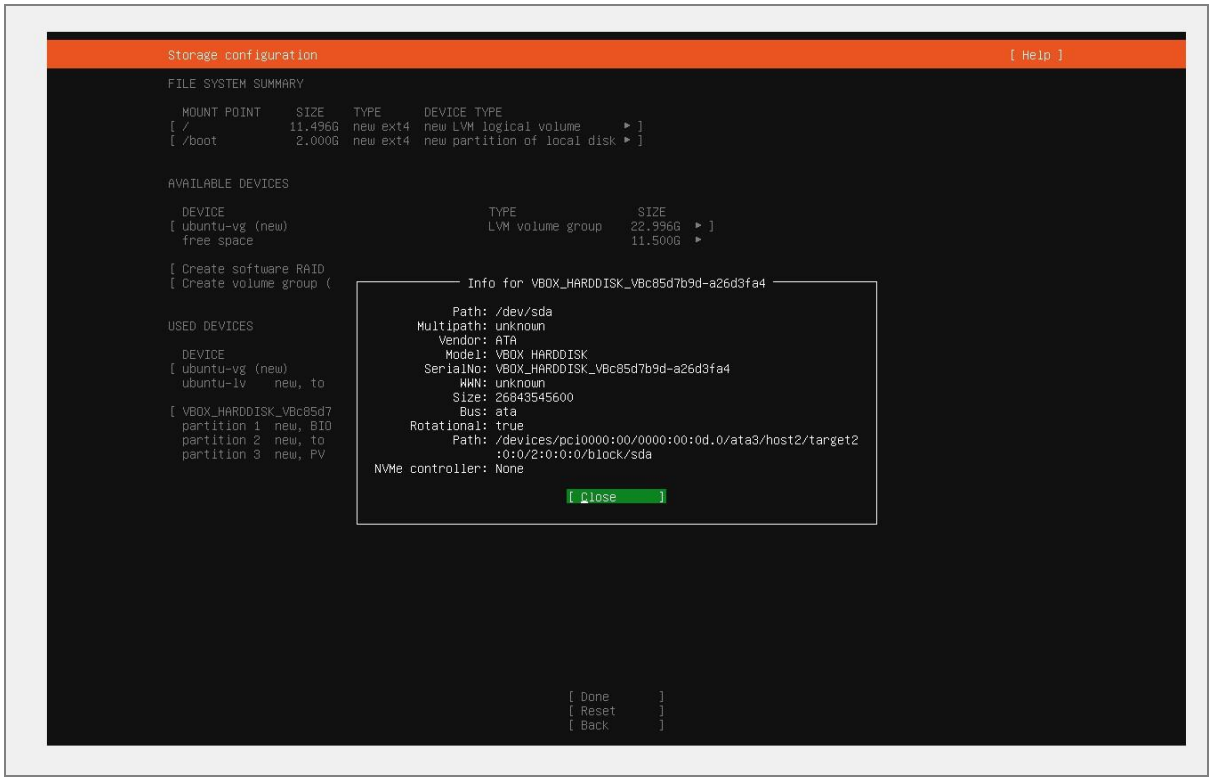

Figure: Disk name and size confirming it is the correct VMware virtual disk.

Task 11: Review the Partitions

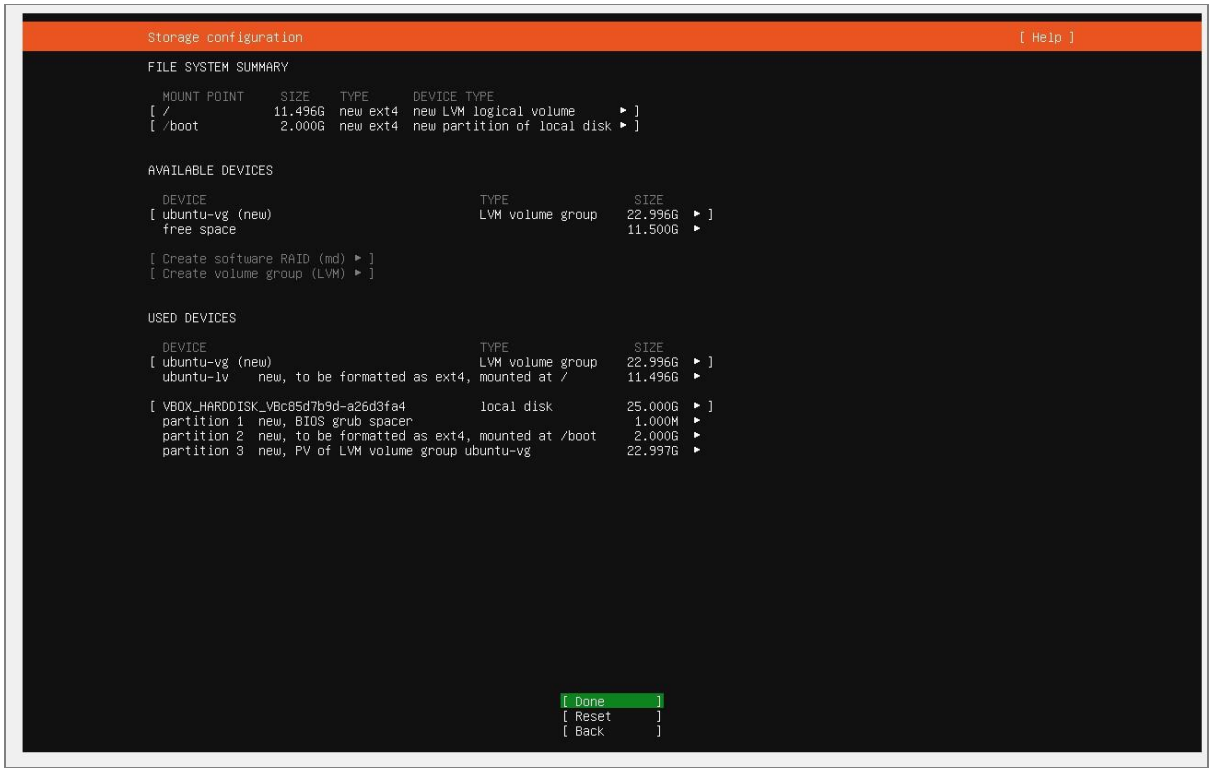

Figure: Partition layout proposed by the installer, belonging to the VMware virtual disk.

Task 12: Confirm the Storage Changes

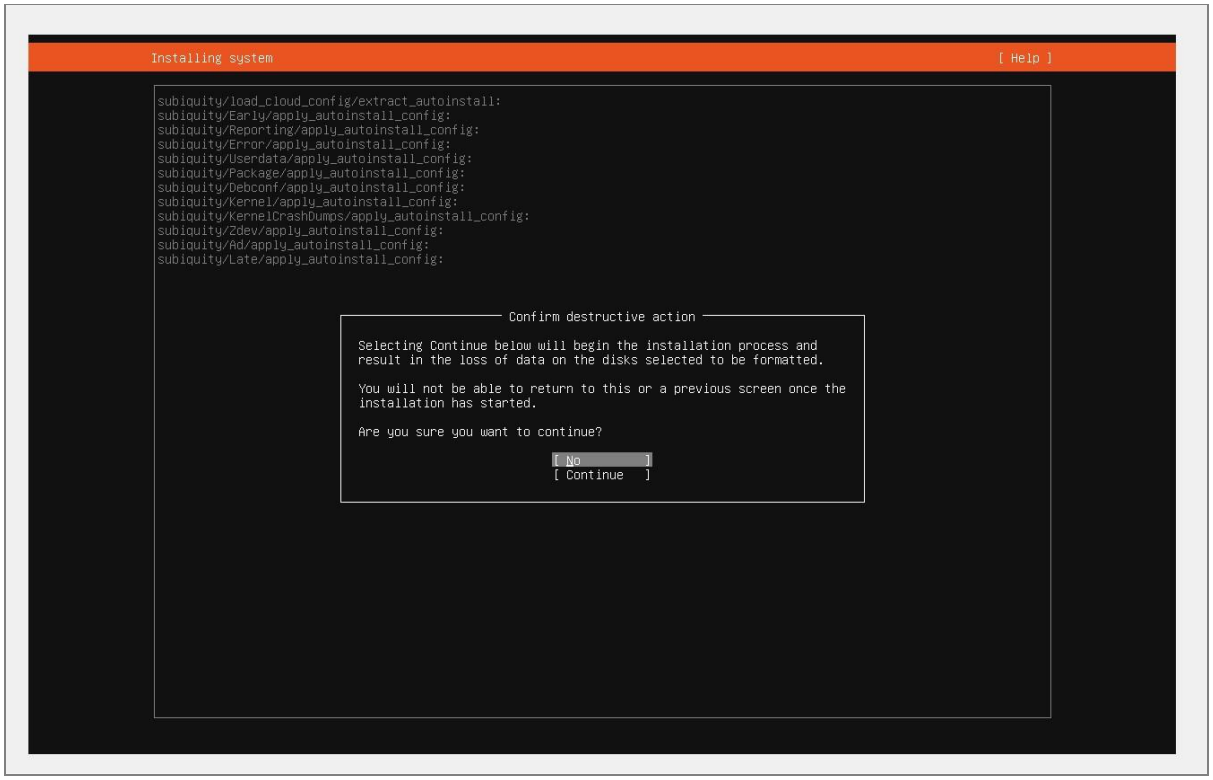

Figure: Destructive-action warning displayed before confirming storage changes.

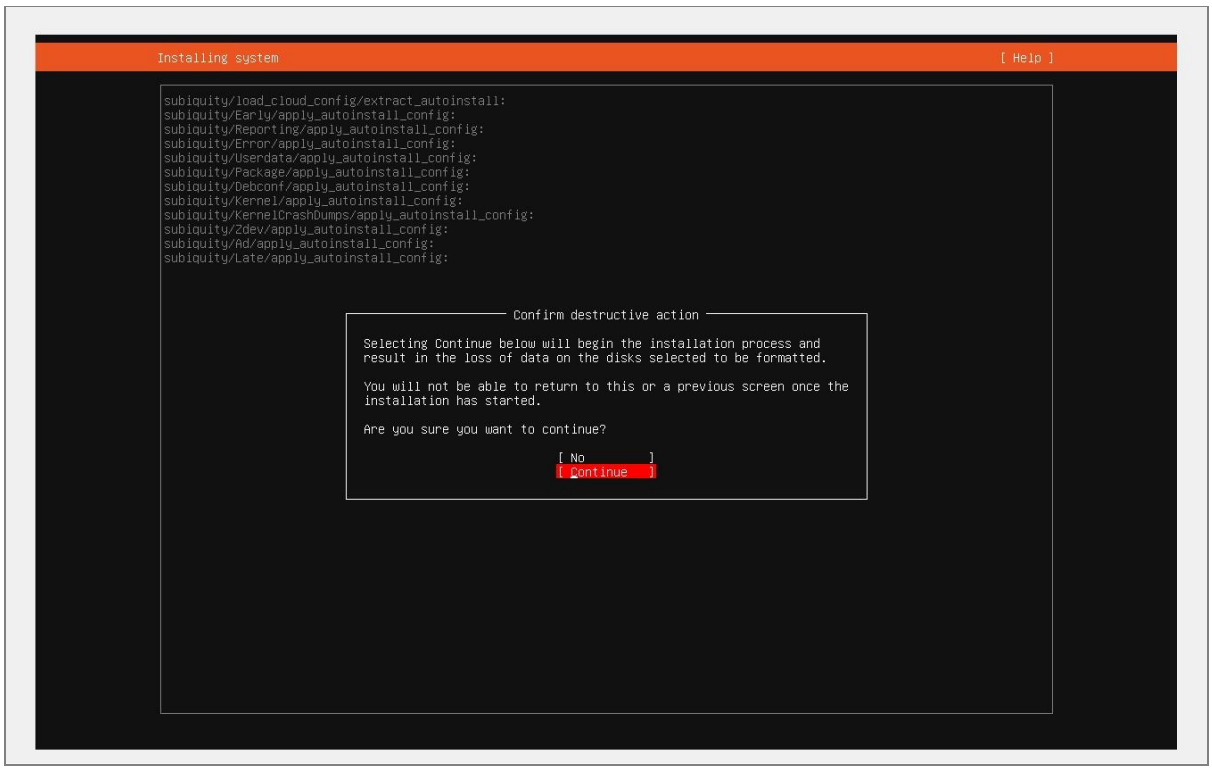

Figure: Storage changes confirmed after verifying the correct virtual disk.

Task 13: Configure the Ubuntu Profile

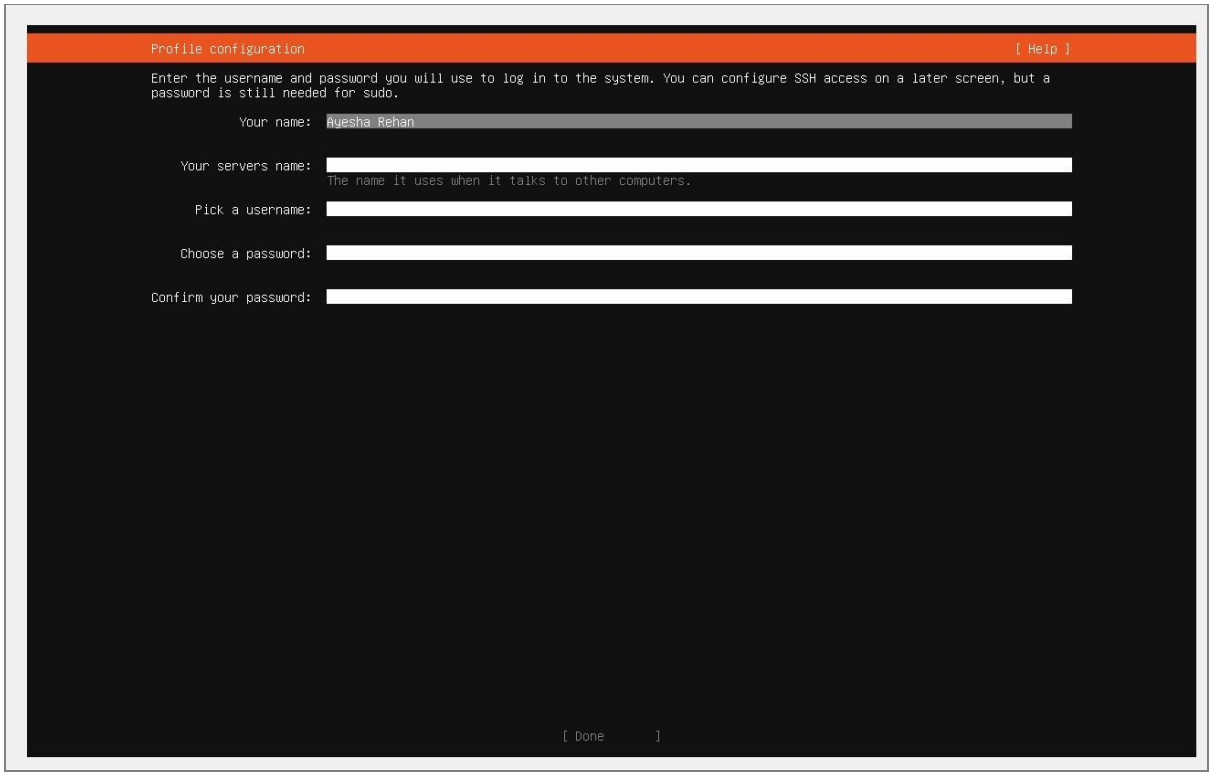

Figure: My complete actual name entered in the Your name field.

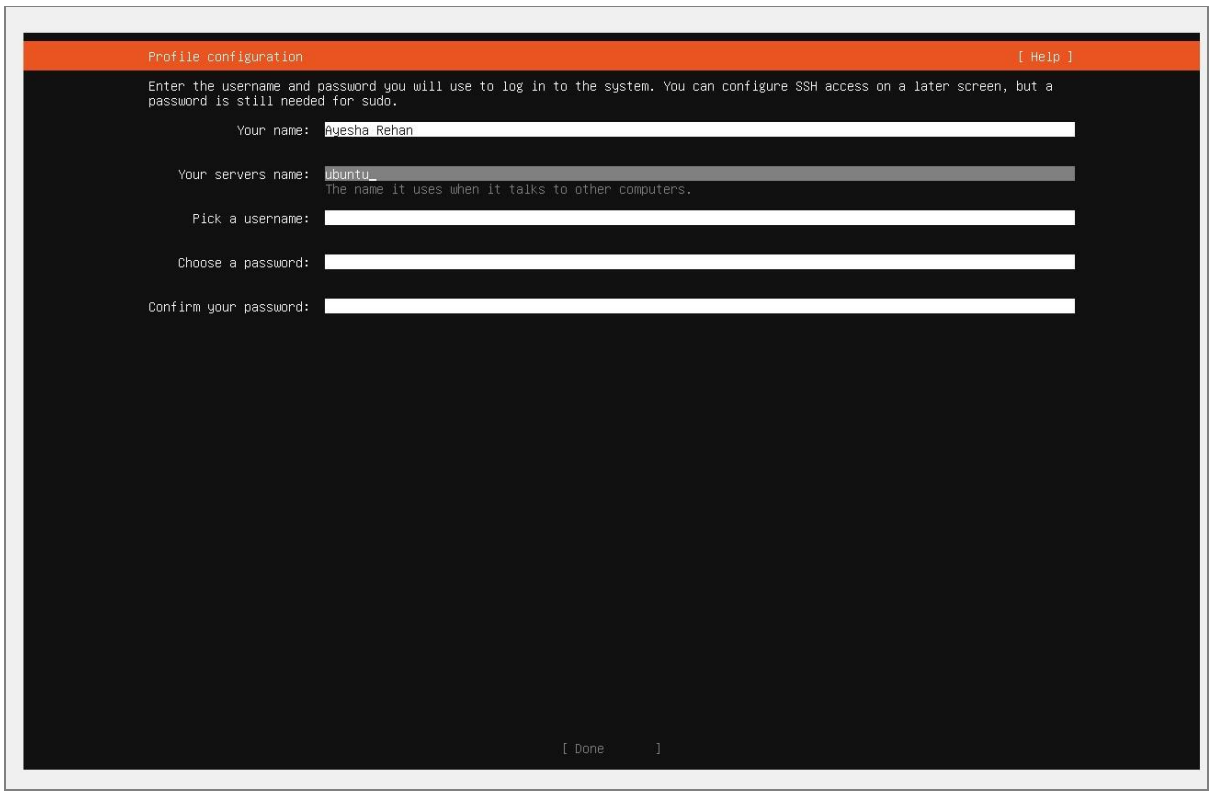

Figure: Server name set to ubuntu.

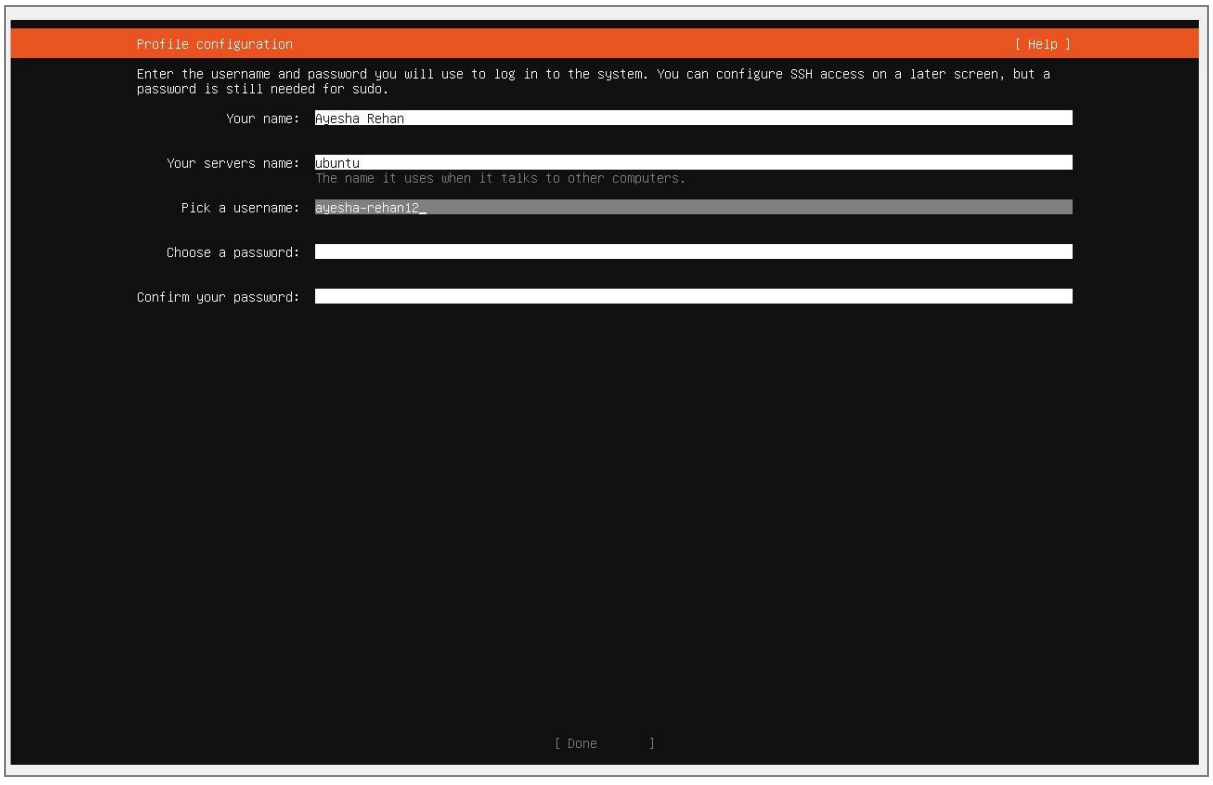

Figure: Ubuntu username set to my exact GitHub username.

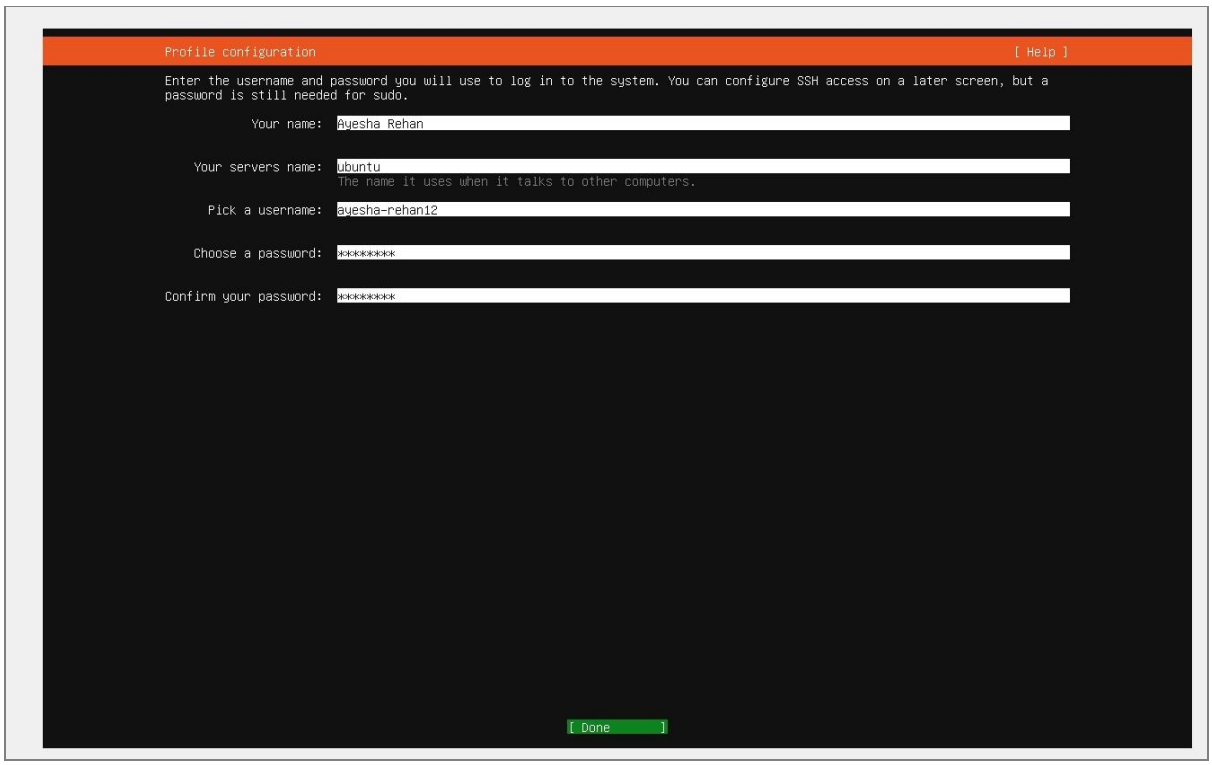

Figure: Completed profile page (password not exposed).

Task 14: Complete the Software Installation

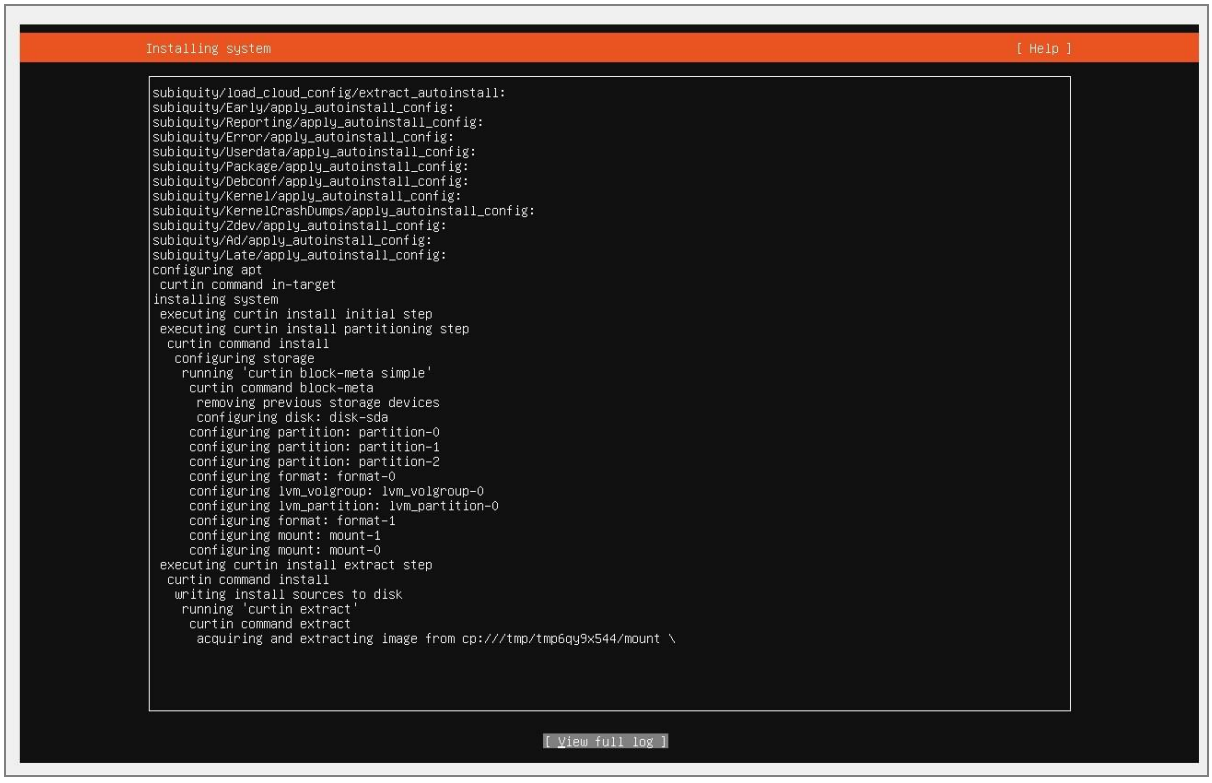

Figure: Ubuntu Server installation progress.

Task 15: Reboot and Verify the Ubuntu Identity

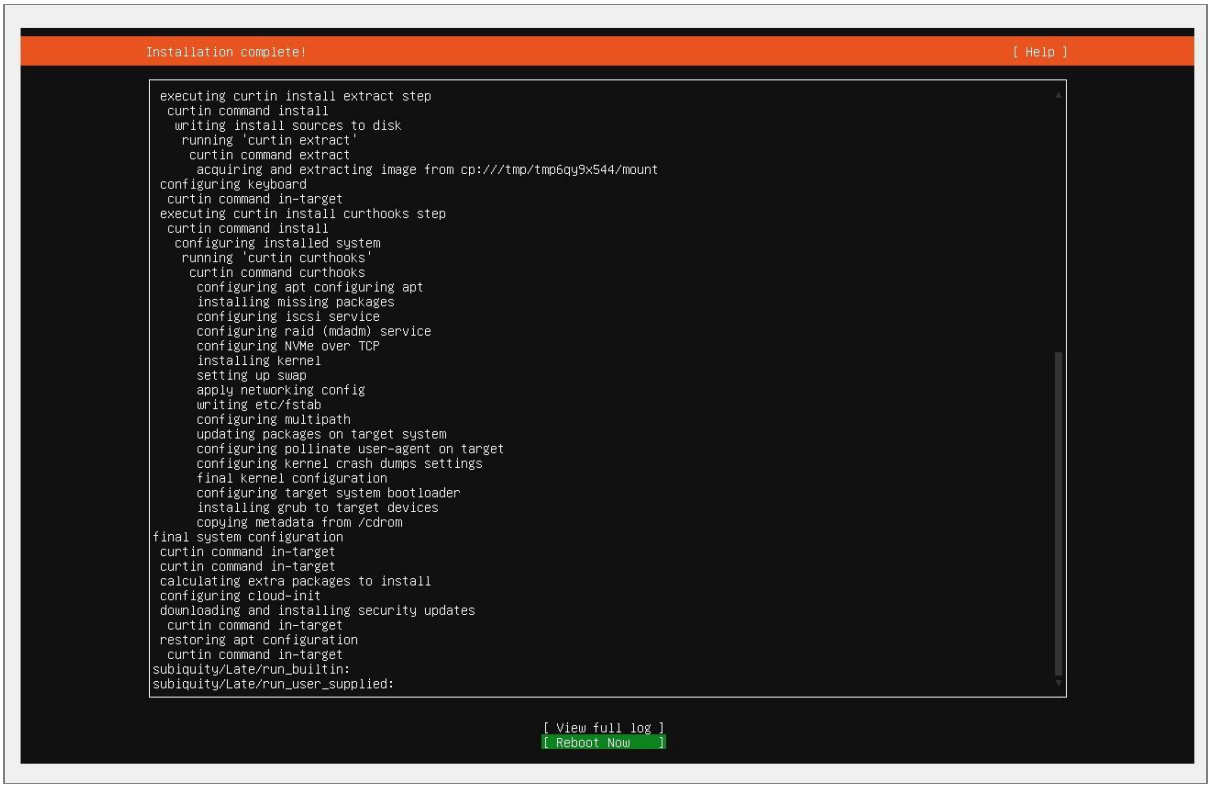

Figure: Installation-complete screen with the Reboot Now option.

Figure: Ubuntu login screen after reboot.

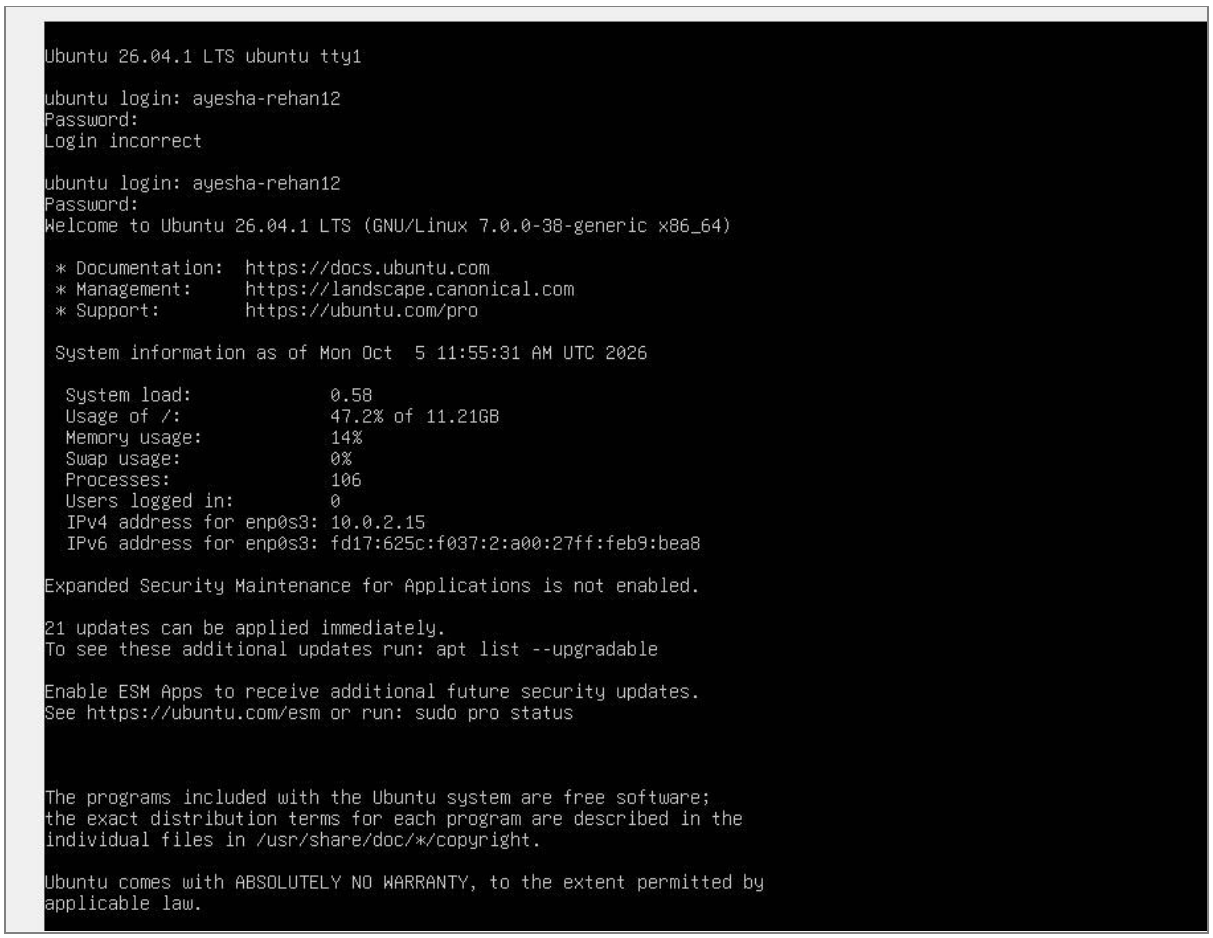

Figure: Successful terminal login with my Ubuntu credentials.

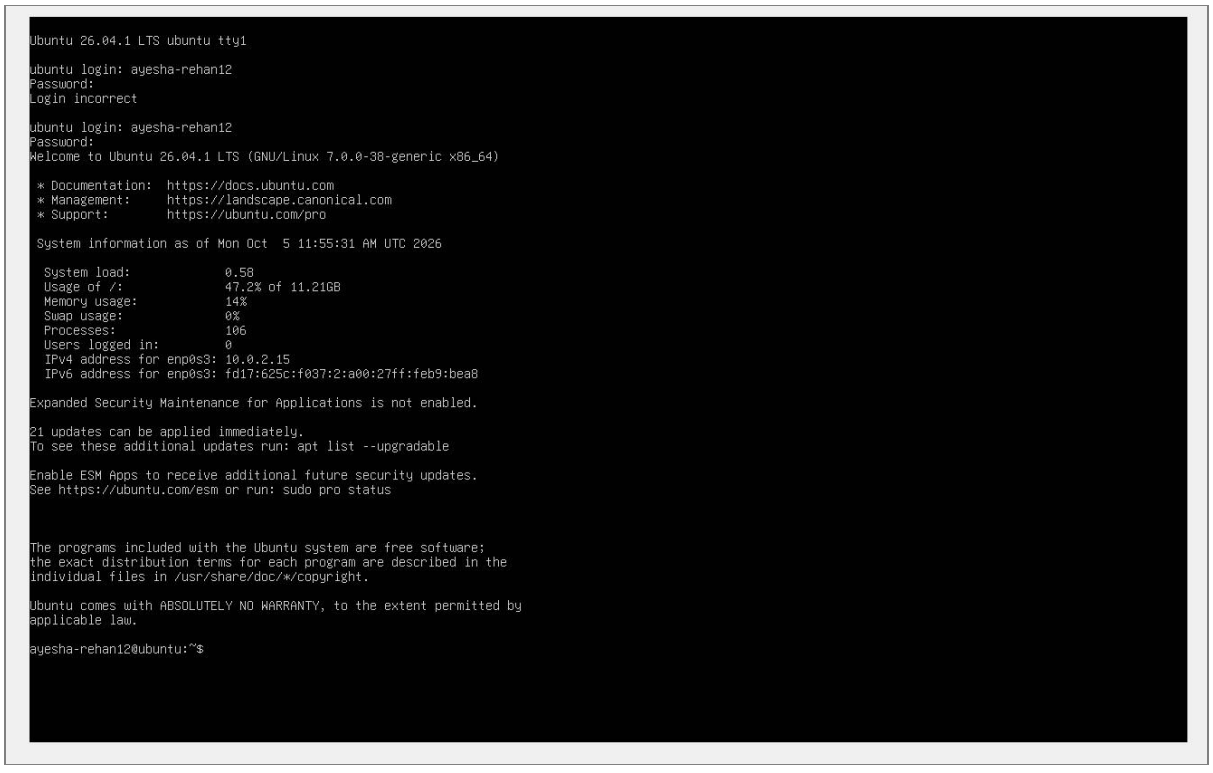

Figure: Terminal prompt showing ayesha-rehan12@ubuntu:~$.

Task 16: Find the Ubuntu Server IP Address

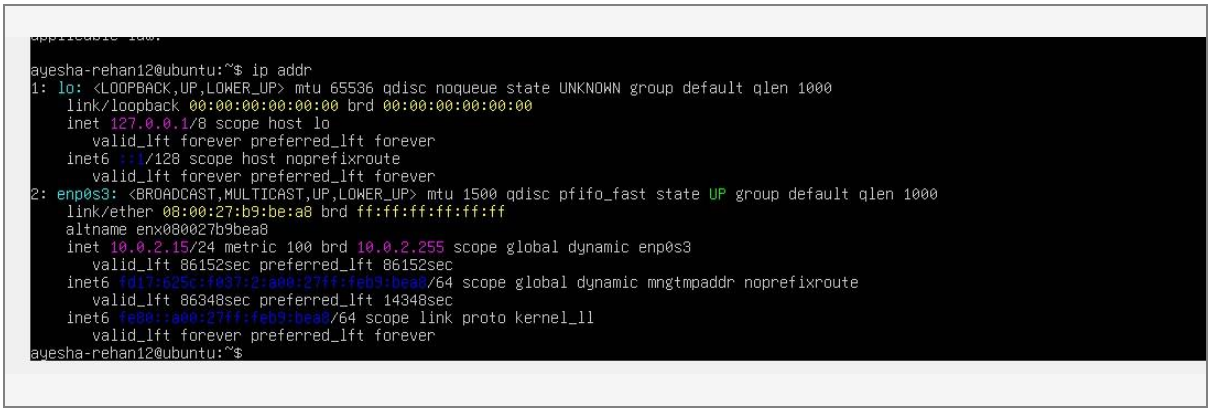

Figure: The ip addr command and its output.

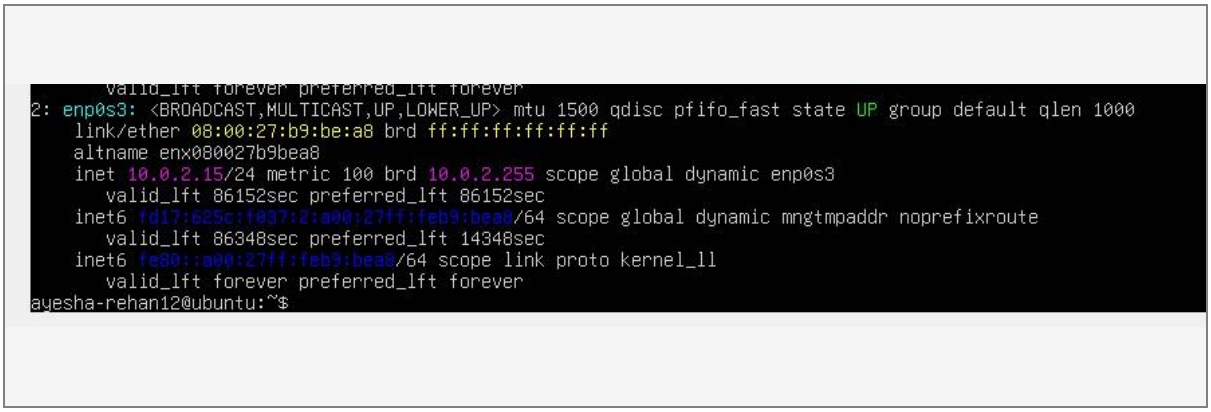

Figure: Correct IPv4 address of the active network interface (not 127.0.0.1), with prompt visible.

Task 17: Connect to Ubuntu Server from Windows

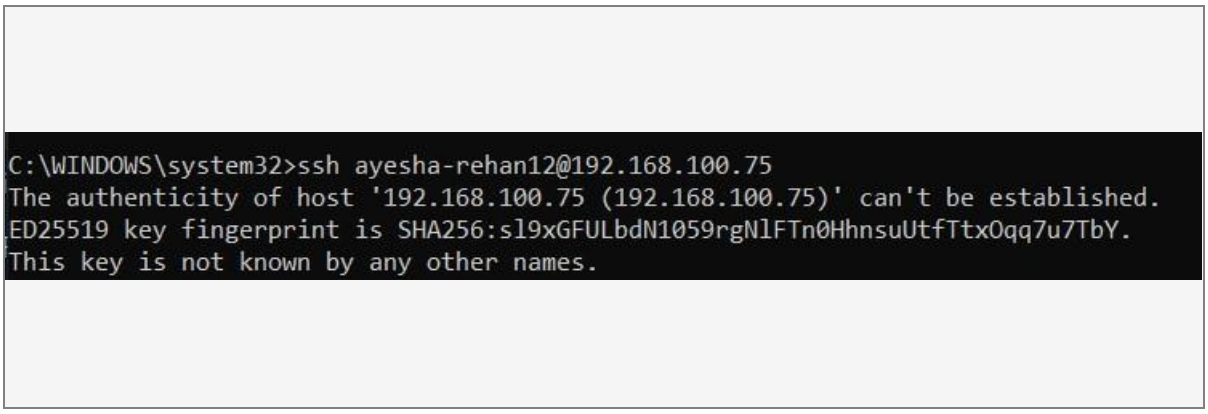

Figure: SSH command run from Windows Command Prompt/PowerShell.

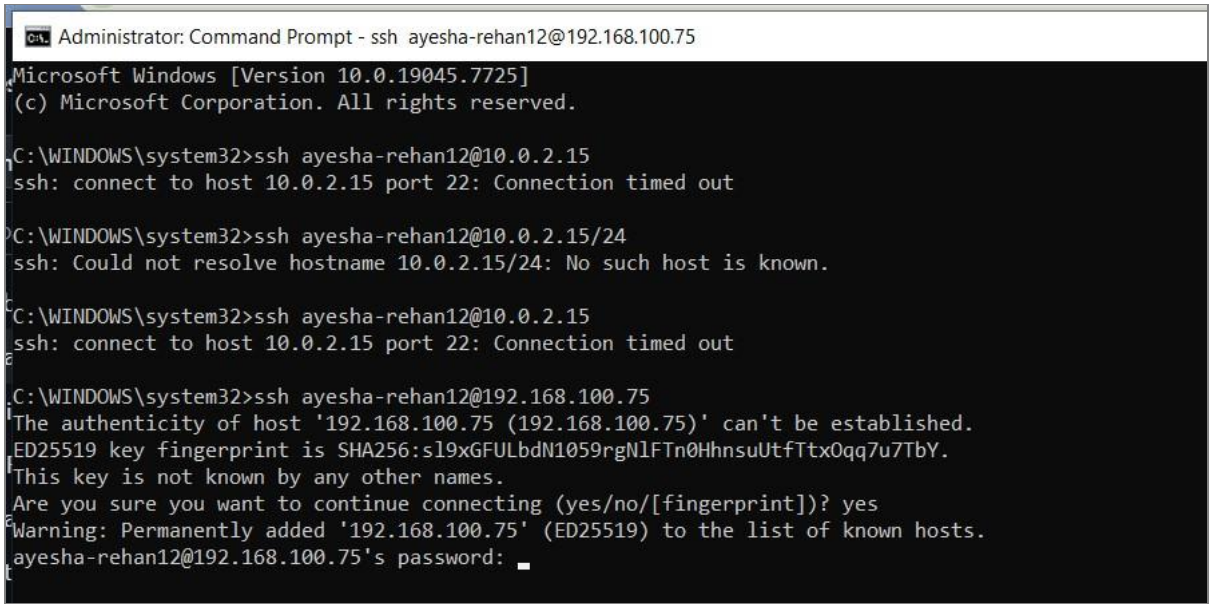

Figure: Server fingerprint accepted by typing yes.

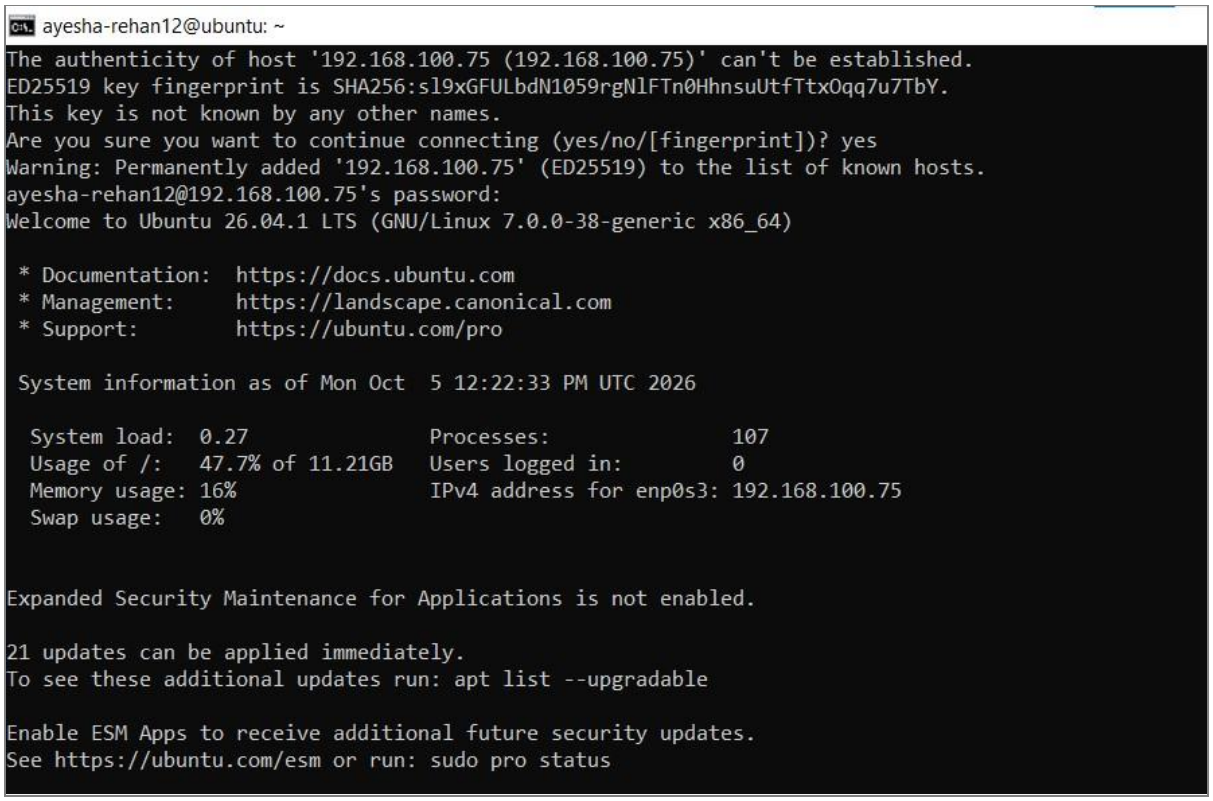

Figure: Successful SSH login session.

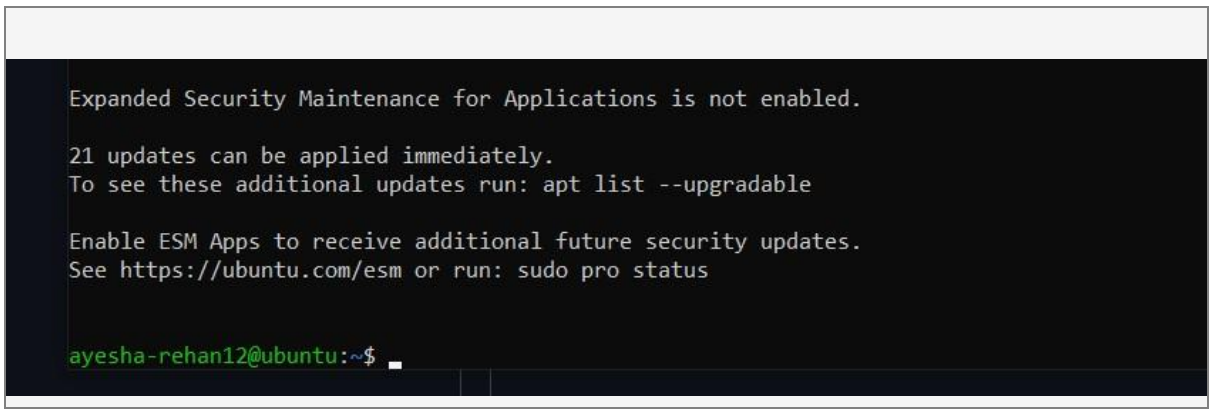

Figure: Remote prompt showing ayesha-rehan12@ubuntu.
